

## Consent for Treatment

We are so glad that you chose us to be your dental care givers. Dr. Emily Graham and staff are committed to keeping you and your family healthy. As part of that ultimate goal, we strive to keep up with the latest technology and scientific studies.

New studies have shown that there is an alarming increase in oral cancer rates in America. **25% of head and neck cancer today is in NON TOBACCO using patients.**

Because we care about your health, Dr. Graham and/or her associated will do a thorough oral cancer screen on every patient once a year. This exam will include: palpation of your head and neck, panoramic X ray and the use the Velscope light to help detect precancerous lesions NOT seen by the naked eye.

We will gladly file these procedures to your insurance. However, for most patients the out of pocket fee will be \$87.00. When/if your insurance pays we will gladly credit the money back to you or place it as a credit on your family account.
